暴龍可說是恐龍界的代表，具有強壯的後腿。The Tyrannosaurus Rex is considered the representative of the dinosaur world, possessing powerful hind legs.

高約1.5米的巨大頭顱中，長著最長能超過30公分的尖銳牙齒，其咬合力推測高達六噸重！Within its massive skull, which stands about 1.5 meters high, grow sharp teeth that can exceed 30 centimeters in length; its bite force is estimated to be as high as six tons!

在「弱肉強食」的時代被稱之為霸王龍可說是當之無愧。In an era of "survival of the fittest," it truly deserves the title "King of the Tyrant Lizards".

The infographic features a green background with a faint illustration of a Tyrannosaurus Rex. At the top, the Chinese characters '暴龍' and the English name 'Tyrannosaurus Rex' are displayed in a stylized, bubbly font. Below this, two columns of text provide scientific and descriptive information. The left column is in Chinese, and the right column is in English. Both columns use bullet points for key facts. At the bottom left, there is a small note in Chinese: '解說內容部分選取於維基百科'.
