

森活步道 **Forest Activity Hiking Trails**

【內文 **Content**】

為早期林場貫通各區域間之作業道，故稱森(林裡)活(動的)步道。

步道沿線四周原始森林密佈，雲霧飄渺，白天走在森活步道上可以看見森林地景生態相互呼應，除享受清新又舒適的森林浴，並聆聽蟬鳴鳥叫聲，感受悠遊在大自然的舒暢。

夏天夜間賞螢，聆聽蛙鳴，讓人心曠神怡，消除一整天疲憊的身心。前行可至水土保持戶外教室體驗區，學習水土保持工法與知識。

This trail was originally built to connect the working paths in different forest reserve areas, which is why it is currently called the "Forest Activity Trail".

The trail is surrounded by primitive forest, while clouds and mist could be closely observed by visitors.

During the daytime, if you walk along this trail, you can enjoy the beautiful sceneries and ecological environment of the forest, an immersive experience that can make you feel refreshed while listening to the tweeting of birds and chirping of cicadas in the forest.

On summer nights, fireflies fly and dance in the forest while the croaking sounds from the frogs bring relaxation and joy to the experience, which makes it a genuinely wonderful place for one's wellness of body and mind.

Upon your arrival at the Outdoor Classroom area, you can learn about soil and water conservation knowledge.
