

東勢林場水土保持戶外教室The Outdoor Classroom of Soil and Water Conservation in Dongshih Forest Reserve

### 【內文 Content】

東勢林場擁有豐富之森林自然生態資源，因地震及豪雨必須做好此山坡地之水土保持工作，運用生態工法規劃野溪整治、平台階段、山邊溝等一系列水保持設施，於 1998 年成立東勢林場水土保持戶外教室，成為水土保持推廣宣導最佳場所。

Blessed with abundant natural forest resources, Dongshih Forest Reserve is dedicated to essential soil and water conservation following historical earthquakes and heavy rainfall.

Established in 1998, this Outdoor Classroom features a series of eco-friendly engineering projects—including check dams, bench terraces, and hillside drainage systems. These facilities serve as a practical demonstration of conservation techniques, providing a premier destination for the public to learn about ecological protection and sustainable land management.
