水土保持設施 平台階段 Soil and Water Conservation facilities: Platform stage

【內文 Content】

定義: 在坡面上每隔適當垂直距離, 沿等高方向, 所築成多條連續之水平或微斜階段。

Definition: At appropriate vertical distances on the slope, along the contour direction, a number of continuous horizontal or slightly oblique stages are built.

目的: (1) 抑制逕流, 防止土壤沖蝕。 (2) 適應坡地耕作需要, 達成安全土地利用。

Purpose: (1) Inhibit flow and prevent soil erosion. (2) Adapt to the needs of slope farming and achieve safe land use.

【圖表標註 Diagram Labels】

- 外斜式: Outward-sloping type
- 台壁: Bench wall
- 台寬: Bench width
- 原始面: Original surface
- 台面外斜 10% 以內: Bench outward slope within 10%
